Park, Racecourse Road  
Milnerton 7441  
Cape Town, South Africa

## **BUILDING OR RENOVATING? SECURITY & IRONMONGERY SHOULD NOT BE ADD-ONS!**

**TALK TO THE SPECIALISTS AT THE PLANNING STAGE.** We recommend choosing the level of security and locks required **before specifying the doors or gates.** This will ensure that both timber and aluminium doors, as well as timber or steel gates, are built with stiles and specifications sufficient to allow for the fitting of **secure, good quality locks, hinges, and handles.**

- **FREE CONSULTATIONS BY TELEPHONE - OR IN OUR SHOWROOM**

No need to guess, or look for bolt-on solutions afterwards – take advantage of our over 120 years of cumulative experience. Even the best CCTV and electronics cannot replace the correct foundation – the doors, locks and ironmongery! We understand ironmongery, and the relationship between doors, locks, handles, and electronics.

- **VAST RANGE ON DISPLAY**

We stock and display a vast range of locks, electric locks, door closers, panic hardware, knobs, handles and other door ironmongery, in brass, chrome, aluminium, stainless steel, and other finishes. Most are on display in our showroom, where you can see, feel and compare the quality of the various items and finishes, and take advantage of our expertise, before making those important decisions.

- **VISIT US**

**B14 Milnerton Business Park, Racecourse Road Milnerton – Monday – Friday 08h30 – 17h00.** Secure environment with plenty of **FREE** parking.

- **SPECIFICATION WRITING & ON-SITE TROUBLE-SHOOTING**

David Miller has over 45 year's experience in both specifying and installing security ironmongery, locks, panic exit hardware and access control systems, and he is available by appointment at hourly rates, for assistance with specifications, supervision of contractors, and trouble-shooting of problem installations.

### **EVERYTHING – FOR EVERY DOOR & GATE**

**We have answers for all ironmongery and security problems – from door closers to door stops, and we can tell you why so many locks, fire escapes and access control systems fail to work correctly!**
