The EN1125 Classification printed on each CE branded CISA panic device identifies the appropriate characteristics of each panic device.
Sturdy, technically advanced easy-to-install design

Unique modular, non-handed design, product and accessory range completeness, suitability for any type of door frame and controllability by electric handles, electric strikers or microswitches.

The CISA panic exit devices have traditionally been technologically advanced products: with FAST the bar has been raised even further in terms of bold, eye-catching design, even more quick, user friendly installation and total interchangeability with earlier versions.

The high-impact new look highlights FAST models’ strong construction and reliability – with installation times reduced by up to 50% compared to earlier versions.
FAMILY FEELING
The new FAST range design is the result of the application of the principle of homogeneity – ensuring aesthetic continuity among the various types of panic exit device and allowing several different designs to coexist in the same environment.

EASY MAINTENANCE
Thanks to the new cover design without fixing screws, all the FAST range products can be quickly disassembled for panic exit device/door fixing inspection purposes and to carry out the required lubrication.
Re-installation at the end of the required service is just as easy and quick.
Reduced unscheduled maintenance requirements.

LOW NOISE OPERATION
The connecting cable used in the FAST products will reduce the operating noise associated with traditional extended bolts.

TOTAL INTERCHANGEABILITY WITH EARLIER VERSIONS
The first requirement that CISA has wanted to fulfill in restyling this range is smooth, seamless change-over to the new version for customers who already owned previous models. Earlier CISA model users will find that changing over to a FAST panic exit device is quick, easy and will not require any action on the door.
Installation has never been easier - or quicker

WITH FAST, INSTALLATION TIMES ARE REDUCED BY HALF

Thanks to the recent technical improvements, installing FAST panic exit devices can be quicker than installing earlier models by as much as 50%!

Installation times are reduced thanks to the possibility to:
- install additional locks on support plates with quick-lock systems and carry out adjustments on site, too;
- carry out easy adjustments via flexible cables connecting the additional locks to the common entrance mechanism;
- use the special adjustment screws on the common entrance mechanism - ergonomically positioned to help the installer;
- carry out installer-friendly cover, cable and bar cutting by following simple instructions which do not require any measurement;
- install the bar in a few simple operations after fixing the mechanisms;
- carry out cover quick fixing without any bolts being needed;
- follow simplified instructions.
1. Mounting plates with quick-lock system for additional locks.
2. Flexible steel cable for additional lock coupling to the common entrance mechanism.
3. Clip-on cover for quick installation without fixing screws.
Applicable European standards

Since 2002, emergency exit systems have been regulated by two specific European standards: EN 1125 for panic exit devices and EN 179 for emergency exit devices. On 16 December 2008 the former standard EN 1125:1997-02 was updated to the NEW EUROPEAN STANDARD on panic exit devices EN 1125:2008. As a result, since 1st January 2010, only the products which have been granted a mark according to the new standard may be marketed.

CISA products have already been successfully submitted to all the required tests and on 2nd January 2009, the required new certificates were obtained for all the “Rim” versions.

Main EN 1125:2008 standard prescriptions:
1) A panic exit device must allow opening at any time by anyone (including children, elderly or disabled users, etc.), by applying minimal pressure with the hands, body or anything else on any point of the horizontal bar.
2) A panic exit device must be applicable to public passage doors (e.g. in shops, offices, hospitals, schools etc.) and must therefore be suitable for extremely intense use.
3) A panic exit device, if applied on a fire door, must be able to guarantee that, after evacuation, the door will close again also in the event of extremely high temperatures.
4) A panic exit device must be guaranteed against corrosion.
5) In a panic exit device the bar projection must not exceed 150 mm.
6) Every panic exit device must carry the manufacturer’s name and trademark, identifying codes, applicable EU standard number (UNI EN 1125), month/year of end user installation by the manufacturer.
7) There may be two types of panic exit device: with a class A push-bar and with a class B touch-bar.
CLASS OF USE. There is a single class of use - which takes into account the possible frequent use of panic exit devices by people who might not be paying attention (risk of accidents or misuse) (Class 3).

CYCLIC DURABILITY. Two classes: Class 6 (100,000 cycles); Class 7 (200,000 cycles).

DOOR WEIGHT. Three classes: Class 5 = up to 100kg; Class 6 = up to 200kg; Class 7 = over 200kg.

FIRE RESISTANCE. Three classes: Class 0 = not suitable for fire/smoke barrier doors; Class A = suitable for fire/smoke barrier doors according to the standard EN 1649-3; Class B = suitable for fire/smoke barrier doors according to the standard EN 1634-1.

PERSONAL SAFETY. A single class corresponding to the maximum safety degree which can be ensured by panic control devices (Class 1).

CORROSION RESISTANCE. Class 3 = high resistance; Class 4 = extremely high resistance.

PROPERTY SAFETY. A single class corresponding to the maximum safety degree which can be ensured by panic control devices - considering that the safety of property is valued less than personal safety (Class 2).

BAR PROJECTION. Class 1 = bar projection up to 150mm (standard); Class 2 = bar projection up to 100mm (low-loss).

BAR OPERATION. A = panic exit device operated by a push-type bar; B = panic exit device operated by a touch-type bar.

SUITABILITY**. Class A = suitable for single or double leaf doors; Class B = suitable for single leaf doors; Class C = suitable for double leaf doors but for the semi-fixed leaf only.

---

** Measurement class introduced by the new standard UNI EN 1125:2008.
The range
FAST Touch and FAST Push - Rim versions

FAST Touch

FAST Push-pad

FAST Push
FAST Touch

TECHNICAL FEATURES
- Painted aluminum/aluminum alloy cover.
- Painted aluminum bar, adjustable in length down to 300 mm on all models.
- Chrome aluminum alloy latchbolts and deadbolts.
- Self-locking top/bottom and side latchbolts.

STANDARD CONFIGURATION OPERATION
- From the inside: by pressing the bar.
- From the outside: with the key and/or handle.

HAND
0 = non-handed.

STANDARD EQUIPMENT
- Special strikers.
- Fixing screws.
- Installation and maintenance Instructions.
- ICIM and CE certificates of compliance.

OPTIONS ON REQUEST
- External drives
- Extended bolts
- Version with microswitch (spec. LA).
- Version with hold open device (spec. FG).
- Fire door version with steel latchbolts (spec. FR).

Finishes: see page 6.

* Operation from the outside with the key only is only possible for single side lock panic exit devices.

CERTIFICATIONS AND MARKS
The adopted technical solutions and the materials used guarantee compliance with the strictest regulatory requirements. This has enabled CISA to obtain marks and certificates including:
- CE mark according to the 09/106/EEC DIRECTIVE granted by ICIM.
- Voluntary product certification granted by the independent certifying body ICIM according to the same standard UNI EN 1125.
The EN1125 Classification printed on each CE branded CISA panic device identifies the appropriate characteristics of each panic device.

FAST Panic exit devices
Sturdy, technically advanced easy-to-install design

### Suggested applications for panic devices

**Main Door = A**
- use only lateral locking points (one or more)

**Secondary Door = B**
- always use only top and bottom locking points.

**Independent Door = C**
- always use only top and bottom locking points.
### OUTSIDE OPERATION DEVICES FOR FAST PANIC DEVICES

**Technical feature:**
- Black aluminium backplate

**Supplied as standard:**
- Fixing screws
- Instruction sheets

**Finishes:**
- Standard Black & Grey.

**Hand:**
- 0 = Non-handed

- Black painted aluminium alloy plate, ..with handle and cylinder 02649.10
- Suitable for:
  - 59001, 59011, 59016
  - 59801, 59811, 59816
  - 59051, 59061, 59066

- Black painted aluminium alloy plate, ..with cylinder 02649.11
- Suitable for:
  - 59001, 59801
  - 59051

- Plate with handle
- Black painted aluminium plate.
- Cylinder 0G304-02-12
- Handle deactivated by key
- Suitable for:
  - 59001, 59011, 59016
  - 59801, 59811, 59816
  - 59051, 59061, 59066

- Microswitch
  - Suitable for installation with 07077-48
  - 06195 00

- Extended bolt kit for outside operation devices 07077-28/29
  - It allows for outside operation device installation on doors above 70mm and up to 110mm
  - Square spindle 7mm
  - Fixing screws
  - 06316 03
Electric Handles for Panic Exit Devices

LOOK AND DESIGN
Compact, minimal design.

EASY TO INSTALL
The electric handle can be installed very quickly and easily.
It is interchangeable with earlier versions and can replace a mechanical handle without modifying the door structure.
The electric handle can be used to remotely control (via an electric button) the opening of doors equipped with panic exit devices with multiple locking points, too.

RELIABILITY
No internal electronic components to prevent operation faults due to water or dust infiltration.

VERSATILITY
The electric handle can be installed on wooden, iron and aluminum doors to match all CISA panic exit devices.

POWER INPUT
Input to the handle via Booster and Booster Plus enables to establish low-voltage connections and ideal operating conditions preventing any problems caused by unsuitable voltage input.
**Technical Feature**
- Grey Painted Aluminium Alloy Cover (fin97)
- Non-handed handle
- LED integral with handle body for door...
- Nickel-plated steel case
- Rated Voltage 12/24V ac/dc
- Operating voltage min. 5V, max 28V

**Operation**
- Power input activates handle
- Key operated emergency system: the key will operate the handle removing the key will deactivate the handle

**Supplied**
- Wiring system with connector for complete connection insulation.
- Cylinder 0G304-02-12
- Power booster 07022-00
- 8/9mm square spindle

**Optional**
- Electric hold-open device available timer 07022-20

- Suitable for: 59000, 59015, 59800, 59815 and 59050, 59060, 59065
- 8mm Spindle with adaptor for 9mm
- 72mm and 85mm centre distance, with... pre-setting for 85mm

- Multi-scale Modular Timer
- One output contact
- Time scale between 1 sec and 10 days
- Operating voltage 12/24 V ac/dc
Technical Features

- To be used with panic exit devices with side latch
- Zinc plated steel case.
- Lacquered aluminium alloy casing
- Chrome plated aluminium alloy striker
- Standard color black, optional grey (code 97)
- Reversible
- Fail Secure

Principal Microswitch
Indicates when the door is open or latch not secure.

Secondary Microswitch
Indicates that the Strike is closed and secure
The EN1125 Classification printed on each CE branded CISA panic device identifies the appropriate characteristics of each panic device.

**PANIC EXIT DEVICES**

**QUALITY YOU CAN MEASURE**

Mortice version panic exit devices. The latest solution available for emergency exit system management. This system combines a panic exit device with a special panic function mortice type lock, with the panic exit device being the only visible element. The result is a complete, certified system combining maximum anti-burglary security with a stylish, beautifully clean design.
**FAST Touch Mortice**

SikurExit: panic function multipoint locks for 1- and 2-leaf aluminum and steel doors

OPERATION
- 3 point locking mechanism for the main leaf and safety lock with top and bottom locking points for the secondary leaf. They can be operated:
  - from inside with a panic exit device (EN 1125:2008) or a handle (EN 179:2008)
  - from outside on the main door leaf only: opening by key (the handle operates the latch only).

COMPLETE RANGE
- Suitable for installation on 1- and 2-leaf doors new.
- Single version for 1- and 2-leaf doors new.
- 2 full height faceplates:
  - "FLAT" 24x3 stainless steel 2300 mm height
  - "U" shaped 24x5 stainless steel 2300 mm height.
- Locks with 30/35/40/45 mm backsets new.
- Secondary door safety locks available in 30/40/60/75 mm backsets new.
- Suitable for installation with panic exit devices Series 59600 or Series Siblock 59710-00/01-0.
- New 1 locking point version.

CERTIFICATION
The materials and technical solutions adopted allow the highest standards to be respected, leading CISA to obtain markings and certifications such as:
- Certified system according to the 89/106/CE DIRECTIVE
- Reference standards: EN 1125:2008 panic exit devices
  EN 179:2008 emergency exit devices
- Voluntary product certification released by a third party ICIM as provided for by EN 1125:2008 standard for specific CISA panic exit devices
- Voluntary lock certification according to the European Standard
  EN 12209:2009 prEN 15638:2008
## Panic function multipoint locks for 1- and 2-leaf aluminum and steel doors

<table>
<thead>
<tr>
<th>TYPE</th>
<th>CONTROLS</th>
<th>OPERATION</th>
</tr>
</thead>
</table>
| **A** | **INSIDE**  
- Panic exit device to open  
- Key to close with deadbolt  
- Key to operate the latch or deadbolt | ![Diagram A INSIDE](image)  
1. Access from inside only possible by using a key  
2. Access from outside only possible by using a key |
| **B** | **INSIDE**  
- Panic exit device to open  
- Key to close with deadbolt or enable/disable the external handle  
- The key operates the deadbolt or enables/disables the external handle to control the latch and to lock | ![Diagram B INSIDE](image)  
1. The external handle can be enabled by turning the key all the way in the opening direction (the engage pin will not be engaged when the key is turned)  
2. The deadbolt can be enabled by turning the key all the way in the opening direction (the deadbolt engages the deadbolt and the latch can be closed) |
| **C** | **INSIDE**  
- Panic exit device to open  
- Key to close with deadbolt  
- The key operates the throw and enables the handle | ![Diagram C INSIDE](image)  
1. The external handle can be enabled by turning the key all the way in the opening direction (the engage pin will not be engaged when the key is turned)  
2. By removing the key, the external handle is automatically disabled |
| **D** | **OUTSIDE**  
- Key to operate the deadbolt  
- The handle is enabled to control the latch with the deadbolt withdrawn | ![Diagram D OUTSIDE](image)  
1. After operating the panic exit device, the deadbolt is operated via the key  
2. The deadbolt is withdrawn |

---

Sect.10.32
MAXIMUM FLEXIBILITY
- Non-handed latchbolt.
- Non-handed square spindle (possibility to select the panic exit device side) new.
- Adjustable latch and anti-picking system new.
- Feeder pin on the deadbolt removable for single leaf doors new.
- Interchangeable with the current 1 locking point version.
- Hold open device in the A/D functions new.
- Can be installed with an electric striker eliminating the anti-picking function new.
- Suitable for installation with an electric handle.

FUNCTIONS FOR OPENING FROM OUTSIDE
- 3 functions are available of which 2 can be obtained with the same lock by only adding an external handle (functions A/D):
  - Function A = without handle from the outside. The key can be used to operate the latch and deadbolt.
  - Function B = with handle from the outside. The key enables/disables the handle to operate the latchbolt.
  - Function D = with handle from the outside. When the deadbolt is withdrawn, the handle is always enabled to operate the latchbolt.

Function A new without an external handle
Function B new with an external handle actuated via the key
Function D new with a permanently active external handle
### SIKUREXIT PANIC FUNCTION LOCKS - 92mm C x C

#### Technical Features
- Zinc Plated Steel Case
- Stainless steel faceplate: 24 x 3mm
- Adjustable latchbolt (11 to 17mm)
- 8mm square spindle
- 20mm Single throw deadbolt
- Nickel plated latch and deadbolt
- Strike 43225STR
- Supplied without cylinder

#### New
- Dead locking latch.
- Adjustable antipicking bolt (9 to 15mm)
- Feel pin on the deadbolt removable for ...single leaf doors.

#### Certification
- This lock is certified according to EN 1125:2008 with panic devices 59711 and 59607
- Category of use grade 3
  Suitable for public buildings
- Durability grade 7
  - 200 000 cycles 120N load ..
- Door Weight grade 7
  - over 200kg
- Fire Resistance grade A
  Suitable for smoke/fire barrier doors according to En1643:3
- Corrosion Resistance grade 4
  - Extremely high resistance

#### FOR SINGLE DOORS AND ACTIVE LEAF OF DOUBLE DOORS

Sect.10.34
**SIKUREXIT PANIC FUNCTION - DOUBLE DOORS SECONDARY LEAF**

**Technical Features**
- Zinc Plated Steel Case
- Stainless steel faceplate: 24 x 3mm
- 8mm square spindle
- Deadbolt feeler pin, 23.5mm stroke .... adjustable by 5.5mm
- Extended bolt connector adjustable .... from 11 to 29mm from faceplate.

**Included**
- Top and bottom rods 07088-03
- Dogging device for top bolt 07089-52
- Floor strike 06086-02-12
- Nylon Upper strike 06141-80

**Certification**
- This lock is certified according to EN 1125:2008 with panic devices 59711 and 59607
- **Category of use grade 3**
  Suitable for public buildings
- **Durability grade 7**
  - 200 000 cycles 120N load ..
- **Door Weight grade 7**
  - over 200kg
- **Fire Resistance grade A**
  Suitable for smoke/fire barrier doors according to En1643:3
- **Corrosion Resistance grade 4**
  - Extremely high resistance

Main Features

SECURITY and SAFETY

- Available lock with only latch and lock with dead-bolt and latch to improve the resistance of the burglarly from the outside. Locks compatible with panic exit device series 59711 and 59600

SUITABILITY

- locks no-handed and compatible for installation on single and double doors

CERTIFICATION & MARKING

- The adopted technical solutions and the materials used guarantee compliance with the strictest regulation requirements. This has enabled CISA to obtain marks and certificates including:
  - CE mark according to the 89/106/CE Directive.
    - Reference standards:
      - UNI EN 1125: panic exit devices;
      - UNI EN 179: emergency exit devices;
      - UNI EN 12209: fire resistant door devices;
  - Voluntary product certification issued by ICIM third-party certifying body according to the UNI EN 1125 standards for specific CISA panic device.

Technical features

- Steel zinc plated face plated
- Steel latch zinc plated
- 9 mm follower

Hand
0 = Non-vented

On request
- European profile cylinder

Characteristics.
- Non handed
- Can be installed in doors not exceeding 200kg, ...
  ...2500mm high, and 1300mm wide

Function.
- with Hold Open Function activated both inside and outside handles
  .....operate freely.
- Turn OFF the Hold Open Function by turning the key.
  • Now only the inside handle is activated
  • When the lock is powered the outside handle will operate.

Electric Data
- 12V dc  800mA
- Minimum voltage required at the lock is 8Volts.
- Opening can be done with timer and booster.

Operation
- Inside by Fast 59711 or 59607 Fire Panic Devices.
- Outside by handles 07076-16

Multi-scale Modular Timer
- One output contact
- Time scale between 1 sec and 10 days
- Operating voltage 12/24 V ac/dc

Booster for use with Timer
- To adapt 12Vdc - 24Vdc - 24Vac
- To reduce power absorption
  Booster in case of insufficient power
**BRITON PANIC EXIT DEVICES**

- **BRITON 377 PUSH BAR-DUPLICATE REBATED DOOR PANIC SET**
  - Comprises 376, 378 & 378DDS
  - For doors up to 2500mm high and 1300mm wide
  - Adjustable top and bottom shoots.
  - Supplied with easy clean socket.

- **BRITON 376 PUSH BAR-VERTICAL PANIC BOLT**
  - Two Locking points
  - Anti thrust device, prevents unauthorised retraction of latch bolt
  - Adjustable top and bottom shoots.
  - Supplied with easy clean socket.
  - For doors up to 2500mm high and 1300mm wide

  Top Flush Face Keeper for Flush Frames
  - NEW

- **ADDITIONAL TOP ROD** – extends height for doors up to 3315mm high

- **BRITON 378 PUSH BAR-RIM PANIC LATCH**
  - Can be fitted with rim cylinder to outside the door
  - For doors up to 1300mm wide

- **Double Door Strike for 378E**

- **BRITON 1413E OUTSIDE ACCESS DEVICE**
  - Designed to fit with all Briton 376 devices.
  - Supplied with cylinder
  - Fixings supplied.
  - Suitable for doors 40mm to 70mm thick

- **Finish** – Grey
- **Suitable for Recessed Door Frames.**
- **Optional Top Strike 376FFKP for flush frames.**
- **Optional Latch Strike 378DDS for flush frames.**
BRITON PANIC EXIT DEVICES – MORTICE PANIC LATCH

BRITON 379EN MORTICE PANIC LATCH
• Supplied without cylinder
• Includes Mortice Panic Latch
• Includes steel box strike

Code | Size | Finish
--- | --- | ---
379EN | 97 | Grey

• Finish – Grey
• Suitable for single doors.
• Also suitable for first opening leaf of double door applications.
• Suitable for doors up to 1300mm
• Hand reversible on site
• Anti-thrust device prevents unauthorised retraction of the latch bolt.
Large 2" x 1/2" stainless steel deadbolt provides maximum security. A standard rim cylinder is used to arm or disarm lock.

Heavy-duty construction provides long service life.

Three finishes available, including aluminium (US28), anodized duranodic dark bronze (313AN/710) and anodized black (315AN).

**Dimensions**

**Exist Alarm Lock**

| Touchbar height to finished floor | 40" (1016mm) at center |
