

ALARMED EMERGENCY EXIT DEVICES FOR DOUBLE DOORS which are too narrow for the **DETEX V40** series:

1. **PANIC BAR WITH VERTICAL RODS** to the fixed leaf
2. **DETEX**® **ECL-600 ALARMED EXIT DEVICE** to the moving leaf
3. **STRIKER PLATE** for Double doors using **DETEX ECL** devices

1. FIXED LEAF: This panic device with vertical locking rods will lock the fixed (second-opening) leaf automatically at the top and at the bottom, whenever that leaf is closed, providing a stable object for the moving (first-opening) leaf to lock against.

2. MOVING LEAF: DETEX ECL-600
DETEX ECL-600 requires a minimum of 750 mm between the hinge-side of the door frame and the locking edge of the moving leaf

The panic bar above can be cut down to accommodate very narrow door sizes. The vertical locking rods offer good security against attack from outside.

DETEX ECL-600 has a stainless-steel latch, as well as a deadbolt, and a battery-powered 95dB alarm. It will latch automatically whenever the door is closed, and will lock the moving leaf securely against the fixed leaf, without hindering escape. The alarm is armed or disarmed using the key, which also re-locks the deadbolt.

ESCAPE IS ALWAYS POSSIBLE regardless of the armed / disarmed status of the alarm, or the status of the battery.

The pictures illustrate the principles. Panic bar may differ from the picture at left.

PUSHING AGAINST EITHER DEVICE WILL ALLOW UNHINDERED ESCAPE NB: ALL THREE items above are required for a pair of **DOUBLE** doors.

Either **F411 09 001** or **F413 78 003 /ECL-600** illustrated above can also be used separately, on any single outward opening escape door. The double-door striker plate is not needed for single doors.

Please furnish accurate door frame measurements to enable us to assist with specifications.

Always specify a door closer (NOT included) on **each door-leaf**, to keep out fresh air, which would fan a fire and distribute toxic smoke.

Specify **one x E401 12 051**
or

one x E401 12 054 for bigger door leaves and / or windy conditions
