Brooklyn 7405, Cape Town  
South Africa

Proud Southern African distributors of the renowned **DETEX** alarmed panic hardware since 2002

## WHEN YOU NEED TO KNOW – EVERY TIME A FIRE EXIT IS USED: SPECIFY AND USE **DETEX** ALARMED EXIT DEVICES!

**DETEX V40** SERIES meet South African requirements for “escape initiated by body weight.” The stainless steel deadlocking latch can withstand over 600 Kg pressure.

Pressure against the heavy-duty panic latch bar opens the door, setting off a loud alarm

- Heavy duty 20 mm stainless steel deadlocking latch ensures automatic re-locking when the door closes, and resists outside attack
- Escape is always possible – regardless of the status of the alarm or power
- The Alarm is armed or disarmed by means of a key
- UL listed Grade 1 panic hardware, UBC 97 standard 7-2 & UL10C for positive pressure
- Exceeds the USA 500,000 cycle testing requirement
- Limited factory warrantee of 10 YEARS mechanical, 3 YEARS on electronics!

**DETEX V40** series model options include: Stand-alone models with battery powered alarm, mains powered alarm with battery-backup, built-in micro-switches for remote monitoring to a control room or alarm system, rugged weatherised versions for outdoor use, delayed exit models with full monitoring and bypass facilities, and **DETEX V40001 X ER** with an electrically retractable latch – for access control. Optional extras available include: Battery backup for the alarm sounder, stainless steel door loops to protect and conceal the cables and **CISA ASTRAL TEKNO S01** or **C3000 T06** high security keys for the alarm bypass. Alarm bypass cylinders can be ordered keyed alike or master-keyed to suit client's needs.

### FOR OPENINGS TOO NARROW FOR DETEX V40 SERIES

**DETEX ECL-600** is a heavy-duty, fire-rated, stand-alone, surface mounted escape lock with a large red exit paddle. Pushing the paddle withdraws the latch-bolt and the deadbolt simultaneously, sounding a loud 95 dB alarm. After escape, the latch re-locks automatically when the door is closed. The alarm can only be reset by means of the by-pass key, which also re-locks the deadbolt. No wiring or external electronics are required with this battery-only 9-volt model.

Options: **CISA ASTRAL TEKNO S01** or **C3000 T06** keys for the alarm bypass, keyed alike or master-keyed.

### DETEX ALARMS FOR MONITORING DOORS THAT ALREADY HAVE PANIC HARDWARE:

**DETEX EAX-500** Stand-alone battery powered instant alarm with key-bypass

**DETEX EAX-300** Stand-alone battery powered delayed alarm with key-bypass

Both use one 9 volt alkaline battery (included) for the alarm. Alarm bypass on all models can be ordered: keyed alike or master-keyed, with **CISA ASTRAL TEKNO S01** or **CISA C3000 T06** keys.

**DETEX EAX-2500S** is a local alarm with remote monitoring capability. It uses 12-24V AC or DC (NOT included) and one internal 9V alkaline battery (included) as a backup. The alarm sounds instantly when the door opens. Alarm bypass supplied with two keys. Options: **CISA ASTRAL TEKNO S01** or **CISA C3000 T06** High Security keys, Keyed-alike or Master-keyed.

WE HAVE OVER 100 YEARS' EXPERIENCE AND CAN ASSIST WITH ALL DOOR & SECURITY HARDWARE
